OPTIONAL ADDITIONAL INFORMATION SUPPORTING NJD (e.g., discussion may include information reviewed to assess potential navigation or interstate commerce connections - 1 to 3 paragraphs): There is standing water at the east end of the project. There are also intermittent pockets of standing water/segments of streambed throughout the project area. The terrain is basically flat throughout the project area with similar vegetation in wooded areas. The streambed ends in an agricultural field with no connection to other waters of the U.S. There are no other connections to waters of the U.S. and therefore no known nexus to interstate commerce
